

Probiotic for a better digestive flora of fish and shrimp

AQUA TECHNA offers PERFOSTIM, an additive solution which participates in maintaining benefic flora in the animal gut to ensure good vitality of farmed fish and shrimp. It also increases their resistance to stressful periods.

PERFOSTIM contains a probiotic, vitamins and a prebiotic with the aims of:

- Contributing to the **development of intestinal flora**,
- Participating to **maintain integrity of the digestive tract**,
- Enhancing growth of the animals.

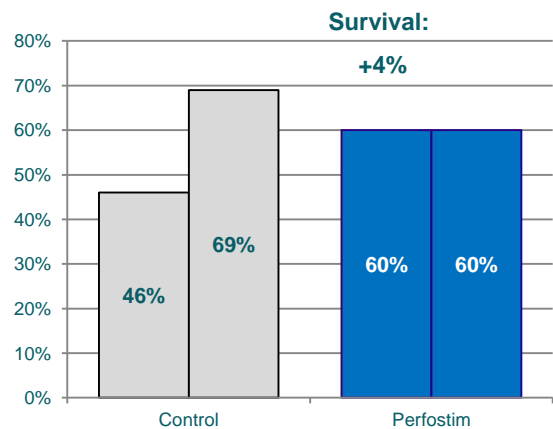

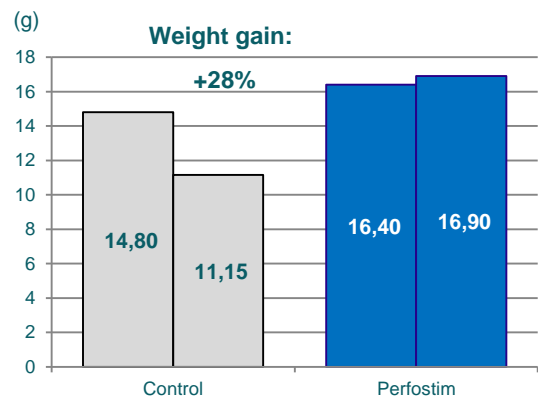

PERFOSTIM is an original additive solution to be used on aqua feed either pelleted or extruded.

PERFOSTIM is directly applied by the farmer through **coating of the feed**.

Mix PERFOSTIM with clear water or quality fish oil then spray it on the feed.

Use the preparation within 24/48h maximum.

PERFOSTIM can also be incorporated in the feedmill after processing (pelleting or extrusion) by coating or spraying.
