

AQUAVIANCE

AQU032

A New Generation of Solutions for Enhancing Performance in Aquaculture

PROPERTIES

AQUAVIANCE is a new and revolutionary concept designed to enhance growth and zootechnical performances while improving the sanitary conditions in farms. This results in securing the quality of the production.

Buoyed by the success of its latest additives, based on essential oil and plant extracts, **AQUATECHNA** has capitalized on this expertise by launching **AQUAVIANCE**, a new additive solution designed to optimize performance in fish and/or shrimp farming.

AQUAVIANCE blends aromatic plant extracts with essential oils and prebiotics (fructo-oligosaccharides) to :

- ✓ Stimulate digestive functions,
- ✓ Manage pathogenic bacteria,
- ✓ Contribute to a good balance of intestinal flora.

AQUAVIANCE's presentation is suited for pelleted or extruded feed. It also ensures optimal protection of active substances thanks to innovative technology, resulting in a better resistance to manufacturing constraints.

AQUAVIANCE can also be directly used in farms.

DIRECTION FOR USE

	Fish (kg/Ton. of feed)		Shrimps (kg/Ton. of feed)
	Starter & Growth	Pathological Problems	
AQUAVIANCE	1 - 2 kg/t	2 - 5 kg/T	2 - 5 Kg/T
