

VITALPROTECT® Secure

LIMITING THE NEGATIVE IMPACT OF MYCOTOXINS ON PERFORMANCE

VITALPROTECT® SECURE is a blend of various ingredients which contribute, through their structures, to adsorbing or limiting the negative impact of mycotoxins*.

A PROVEN EFFICIENCY :

VITALPROTECT® SECURE reduces contamination of feed by mycotoxines (aflatoxin B1). Trials showed a 93% adsorption capacity in vitro (in vitro trial on aflatoxin B1, Vitalprotect Initial, 2014).

Reduction of the negative impacts of other mycotoxins such as DON, fumonisins, zearalenone, are among others, actions achieved by VITALPROTECT® SECURE

Discover our Vitalprotect® range :

Initial

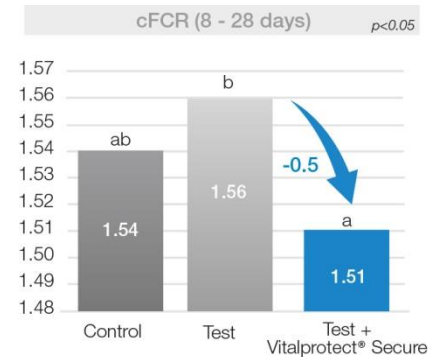

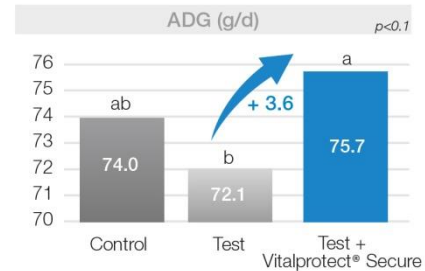

Secure

Mold

* DON, Fumonisines, zearalenone

VitalProtect significantly improves performance compared to a contaminated diet without Vitalprotect® Secure.
